

**Assessment: Task 2**  
**(500 words) 35%**

**Learning Outcome 3**

Describe the socio-cultural determinants of health for a selected range of groups in New Zealand.

**Due date:** 4pm Wednesday 21st March 2018

**Task:**

Social, economic, cultural and historical factors contribute to inequalities in health.

Health risk factors may be related to:

- 1) Socioeconomic position,
- 2) Ethnic identity,
- 3) Geographic, place of residence,
- 4) Gender.

A) **Choose** two factors from the above categories and **identify two** at risk groups **one** from each category.

B) **Describe** the social determinants of health that affect your chosen groups. You should include demographic data. (400 words).

Your work should evidence that you have read a range of appropriate sources such as:

- Ministry of Health (2002). *Reducing inequalities in health*. Retrieved from <http://www.health.govt.nz/system/files/documents/publications/reducinegal.pdf>
- McMurray, A. & Clendon, J. (2014). *Community health and wellness; Primary health care in practice*. Chatswood, Australia: Elsevier.
- Relevant NZ Ministry of Health publications. <http://www.health.govt.nz/publications>

Professional Nursing in Aotearoa/New Zealand: Task 2
